A REPORT ABOUT DATA COLLECTION
NAMULI GRACE 213003564 14/U/12296/EVE

1 Introduction

This report is about how l came up with my form that l used to interview my interviewee.

1.1 What is my report about?

The report will solve the issue of transport costs that student face when coming to campus via their transport.

1.2 Aims/objectives

1.2.1 Main objective

To provide students with one mean of transport with a uniform price that is affordable to the students.

1.2.2 Specific objectives

- To reduce on the accidents that students experience due to the reckless drivers.

- To enable students reach campus in time so they dont miss their lectures in case of slow drivers.

- To increase the safety of students since the driver and conductor that is assigned to drive students to campus is known and trusted.

1.2.3 Problems faced while collecting my data.

- It was hard to convince some students to give me a few of their minutes.

- I had to pay some students transport fee especially those l found in taxis.

- For the students that owned their cars, it was hard for me to approach them until even others made me sit in their cars and drove until the questionnaires were done.

- the form doesnot cover al the neccesary questions that would have been asked.

1.3 Aim of the form

The form was filled in by various students and it helped me know the main difficulties that the students incur to come to campus.

- the form helped the students to express their views about how they feel about the transport costs.

- it also helped them to be able to speak about how they would like the government to help them out.
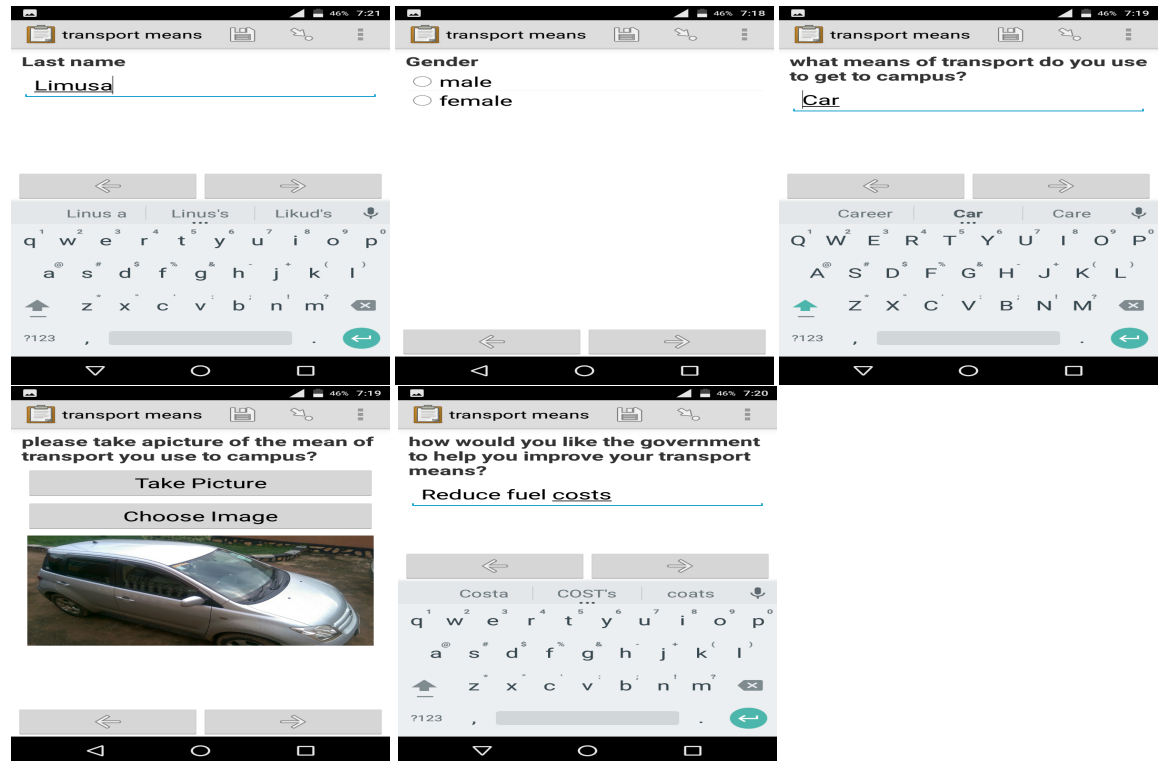

1.4 Research significance

With all the difficulties that students go through, it is necessary for them to get some help with minimizing the costs of transport incurred.

2 Research methodology

I used the form that l created and approached every student and requested them to fill in correctly the form. the form had aloy of questions that each student had to answer with my guidance of explaining where they ddint understand properly.

2.1 screenshots of the form

3 Recommendation

I would recommend the students to use the cheapest means of transport,that is taxi which are fairly charged and maybe stop sitting in old cars that can break down easily. i would also ask the government to come out and help where neccesary because i too am a student and i need to be sure of my security.

4 conclusion

According to the topic of transport,i think there should be a common transport mean mainly put there for the students to use only,that way students are encouraged to come to campus earlier and also lessen on the troubles that the students go through.
